CLOUD ENGINEER PROSPECT

My career goal is to work in an environment promoting learning and further development of skills usable in and around cloud tasks. I am an eager individual with a keen eye for detail. I also possess good interpersonal skills and an understanding of diversified thoughts (for there might be more than one solution for a particular problem).

TECHNICAL SKILLS

Programming/Code: JAVASCRIPT, NODE JS, REACT, MARKUP LANGUAGE & PYTHON (LEARNING)

Cloud: AWS, including EC2, EKS, IAM user, AMI, Load Balancers & Network and Security modules

DevOps: TERRAFORM, DOCKER, KUBERNETES & CI/CD (GitHub Actions)

Data: Intermediate SQL, POSTGRESQL, NoSQL & Database Modelling

Methodology: Agile/Scrum & Trello

Testing: Test Driven Development (TDD)

PROFESSIONAL EXPERIENCE

NORTHCODERS
CLOUD ENGINEER (JANUARY 2024 - APRIL 2024)

This course was amazing, not only has this improved my ability to adapt to new types of problems but also supported new ways to resolve problems within individual and paired work. I am eager to develop as a Junior DevOps Engineer and contribute to projects. Access to my projects can be viewed on my Github: **https://github.com/johanAurel**

Accomplishments:
- Understanding and being able to implement concepts of front end such as **HTML** and **CSS**
- I am proficient with Javascript and understand the use of object-oriented and functional programming
- Learned how to use and implement back-end concepts of programming
- Can fully use npm and its constituent dependencies
- Collaborated on projects with the use of GitHub and git related terminologies
- I perfectly understand and implement the use of LINUX/UBUNTU command line
- Can effectively use AWS and Infrastructure as code as **Terraform**, **Docker,** and **Kubernetes**

I built projects showcasing my skills where; I had to create a terraform code to deploy services notably in **public subnets** and one in a **private subnet** and had to access two of them on **dynamoDB**. I created **machine images, launch templates,** and **auto scalers** for all public services. Also, a user with **Identity Access Management** to access my database.
The link to my project repository is: **github.com/johanAurel/Final-Infrastructure-As-Code-Project**

V5 MARKETING COMPANY

SALESPERSON   (MAY 2024 - NOW)

I am currently contracted as a salesperson for the company, selling various products from commercials like energy and broadband to representing charitable organisations. Due to my constant exposure to different types of customers/donors, my interpersonal and customer service skills are much more sharpened. I am very comfortable interacting with a wide variety of people exuding a wide range of different emotions. Also, something major is my eagerness and dedication which are another level due to your income being a measure of your commitment and effort. Moreover, starting at the lowest and progressing within a few weeks of my being in the business to a leadership role and effectively transmitting my skills helped enhance my learning, teaching and leadership skills.

THE GOAT

FRONT OF HOUSE (FEBRUARY 2024 - MAY 2024)

I worked in a team where we helped each other improve and effectively deliver our tasks. Due to this line of work, I am constantly exposed to customers and as a result, my interpersonal skills and customer service skills are continuously being polished. Also because of the nature of the work, I constantly undertake different roles where there is a need to forge new skills.

LOCAL CHURCH

ASSISTANT TEACHER   (2022-2023)

I collaborated with team members to instruct students in english lessons using **learnenglish.britishcouncil.org**
I communicated with students to assess their challenges and help them by providing bespoke solutions. With the use of an online platform, we delivered pre-course content before every class.

GYROS - SUNSHINE CAFE

FRONT OF HOUSE   (2023)

I was working as a front-of-house member during this time, I was in charge of two other waiters so I developed my management, problem-solving and communication skills.

EDUCATION

INTERNATIONAL SCHOOL COMPLEX "LA GAIETE"   (2017-2019)

Advanced Levels in Pure Sciences

MIDDLESEX UNIVERSITY   (2020)
Mechatronics

COURSES

NATIONAL INFRASTRUCTURE SOLUTIONS   (OCTOBER 2023-NOVEMBER 2023)

CONSTRUCTION SKILL CERTIFICATE SCHEME
For the length of this course, I learned about the various ways to assess and deal with incidents and accidents, the various requirements from a skilled professional relative to this scheme, various laws surrounding it and the implementations of health and safety principles.

Accomplishments:
- Health and Safety Level 2 Certificate.
- Asbestos Awareness Certificate.

SECURITY INDUSTRY AUTHORITY(DOOR SUPERVISOR and CLOSED CIRCUIT TELEVISION)

Through out this course I learned how to detect a risk reduce its plausibility and act on its occurence. In this course the emphasis is made on the respect of our selves and others and strict watch of protocol.

Accomplishments:
- SIA Door Supervisor.
- SIA CCTV Operative.
